Instructions for Assignments:

- **Please provide all the answers in soft forms (including the C++ codes and the tables). The mathematical analysis can be written in MS Word using an equation editor.**

- **Assignments are _individual_ efforts and will be graded as such. Assignment submissions violating this rule _will not be graded_. Although collaboration is encouraged, submitted assignments must totally reflect that individual effort. Any help from other sources or from collaborations must be cited in the submitted assignment as references (e.g. from colleagues, internet, books, etc.).**

- **The policy for delays in submission of assignments after the due date is:**

$$Maximum\ Grade = Round\ [\frac{100}{1+(\frac{Delay}{7})^2}]$$

with Delay in days.

Delays 0 through 7 days
  100   98   92   84   75   66   58   50
Delays 8 through 14 days
   43   38   33   29   25   22   20
Delays > 14 days : Zero Grade
